3. UNIT ECONOMICS SUMMARY

Cost per Patient Encounter

For a complete **30-minute doctor consultation**, including real-time medical transcription, clinical SOAP note generation, audio archiving, cloud hosting, and HIPAA Google Workspace email, the total cost is only **\$0.169 (under 17 cents per visit)**.

Cost per Doctor per Day

A doctor seeing 30 patients across a 15-hour clinical day costs **\$5.07 per day** to support with ambient AI notes and enterprise Google Workspace. At standard physician compensation, this cost is recovered in the first 2 minutes of the day.

Key Volume Insight on 324,000 Minutes: At 30 min/visit and 30 patients/day, 30 doctors generate 648,000 minutes in a 24-day month. If your contract or pre-purchased pool is exactly **324,000 minutes**, this covers **12 full clinic days for all 30 doctors** (or 24 days for 15 doctors), costing Anot Health exactly **\$1,825.70** including Google Workspace.

6. PITCHING TO THE CLINIC MANAGEMENT (THE VALUE EQUATION)

The Time Burn Problem At 30 patients a day with 30-minute consultations, doctors are working 15 hours of patient care daily. Charting notes manually would require an extra 2.5 to 3 hours every night per doctor. Across 30 doctors, that is 75 to 90 hours of overtime charting every day.	The Clinic ROI Anot Health generates the full SOAP note in real-time as the visit concludes. By saving 2.5 hours per doctor daily across 24 days, you reclaim 1,800 hours of clinical time per month. Valued at \$150/hr, that represents \$270,000 in monthly clinical value for an investment of only \$11,970.
