

ANOT HEALTH

AI-Powered Medical Scribing

Secure, HIPAA-Compliant clinical documentation — automated from the moment you start the visit.

🕒 Save 2+ hours daily

✓ 98–100% accurate

🛡️ HIPAA-compliant

Transform clinical documentation in minutes, not hours.

anot.health • Documentation that writes itself, so you can focus on care.

MEDICAL SCRIBING | BILLING | CODING

Physicians are drowning in **paperwork**, not practicing **medicine**.

For every hour of patient care, clinicians spend nearly two hours on documentation. Burnout is rising, and existing tools are clunky, inaccurate, or unsafe with patient data.

2 hrs

spent on EHR & desk work for
every 1 hour with patients

63%

of physicians report burnout
symptoms tied to
documentation

Why current solutions fail

Generic dictation tools misfire on clinical terms, require heavy editing, and store sensitive audio without proper safeguards.

Workflow friction

Manual templates, copy-paste, and toggling between apps break the flow of the visit and steal attention from the patient.

15+ min

of after-hours charting per
patient encounter

#1

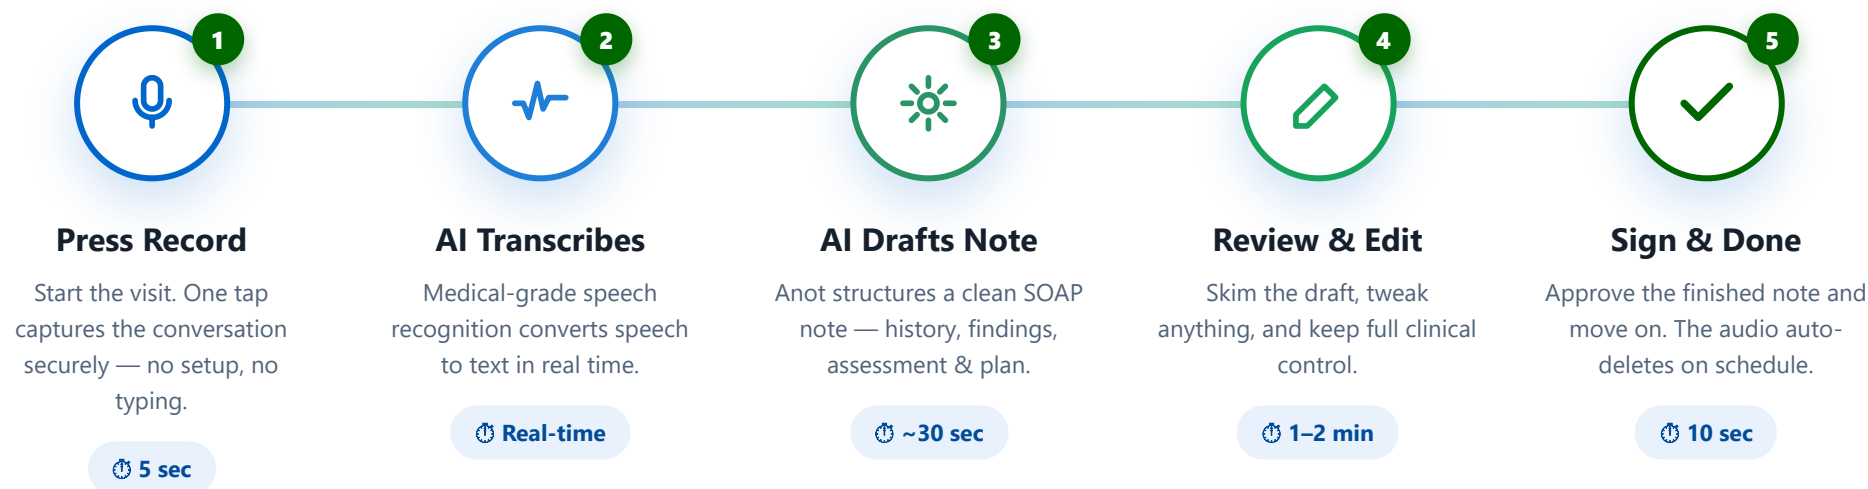

concern blocking AI adoption:
data privacy & HIPAA

THE VISION

Anot Health turns every conversation into an accurate, structured clinical note — automatically, securely, and in minutes — so clinicians get their evenings back.

From conversation to chart in **five effortless steps.**

You talk to your patient like you always do. Anot listens, transcribes, and writes the note — you simply review and sign.

Doctor's POV: "I just talk to my patient — by the time we're done, the note is already written. I review for a minute and sign. No more late-night charting."

Everything a modern clinic needs — **nothing it doesn't.**

Ambient AI Scribing

Captures natural doctor–patient conversation and turns it into a structured clinical note automatically — no dictation commands required.

Smart SOAP Notes

Auto-organized into Subjective, Objective, Assessment & Plan.

Real-Time Speed

Notes ready seconds after the visit ends — not hours later.

HIPAA-Grade Security

End-to-end encryption with signed BAAs across the stack.

Specialty-Aware

Understands clinical terminology across specialties.

Auto Data Lifecycle

Audio auto-deletes after 90 days — no clutter, no risk.

Works Anywhere

Web-based and device-friendly — set up in under 5 minutes.

Built for **healthcare-grade** privacy from day one.

Patient data is protected at every layer with enterprise infrastructure and signed Business Associate Agreements (BAAs).

AWS

BAA SIGNED

HIPAA-eligible cloud infrastructure with encrypted storage & access controls.

Anthropic

BAA SIGNED

Enterprise AI with zero training on your data and strict privacy guarantees.

Deepgram

BAA SIGNED

Medical-grade speech-to-text processed under HIPAA-compliant terms.

ENCRYPTED END-TO-END

Capture
